

University of Connecticut Health Center

The Ethel Donaghue Center for Translating Research into Practice and Policy

2009 – 2010 Seminar Series

The TRIPP Center series focuses on practice-oriented translational research, seeking to improve processes of care and health outcomes by accelerating the transfer of evidence-based medical practice into the community. This year the emphasis is on translational informatics. We have invited leaders in each area to present and provide our audience with the opportunity to learn about their research. Please save the
